

- 1 Install the slides  
( wardrobe inner depth  
must be  $\geq$  aluminum  
frame's width + 5mm
- 2 Install the slides cover

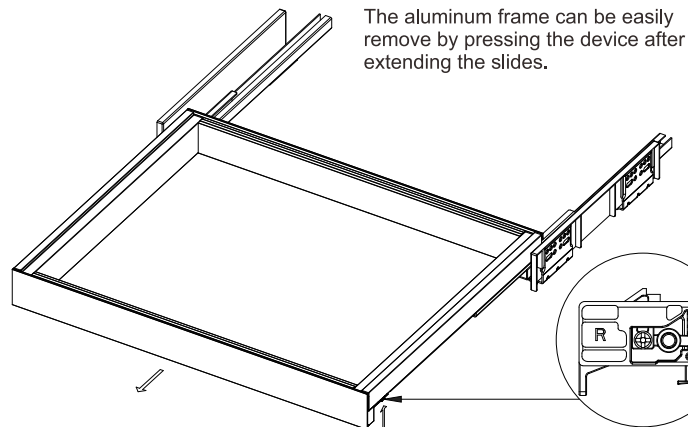

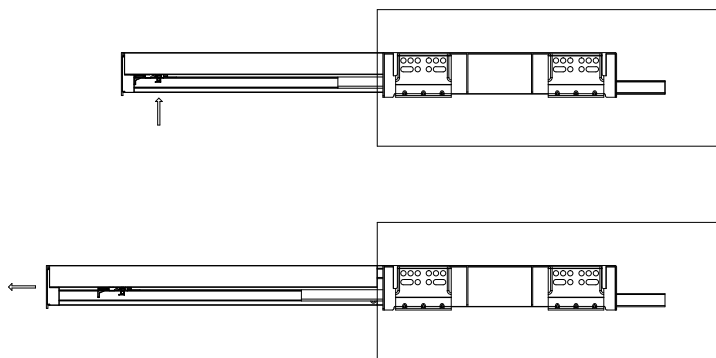

Adjust the width of aluminum frame by screwdriver,  
in order to put onto slides smoothly.  
The adjustment device is in the bottom of aluminum frame.  
All the aluminum frame's left and right side can be  
+10mm per side ( +20 mm totally ).

- 4 Put the aluminum frame onto slides and check if the  
slides can move smoothly.
- 5 Put the wardrobe fittings onto the aluminum frame; here enclosed the  
storage basket as an example.

## Remove the aluminum frame

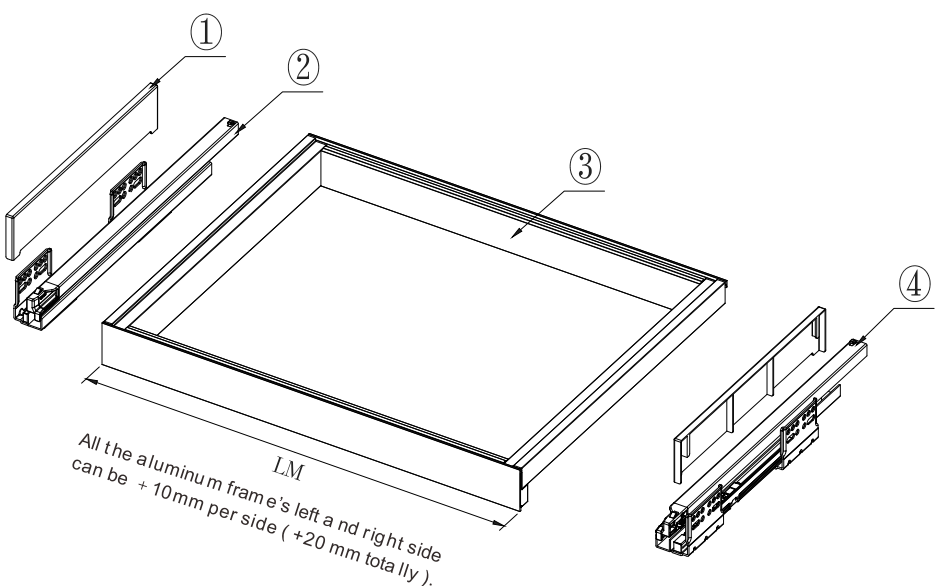

The aluminum frame can be easily  
remove by pressing the device after  
extending the slides.

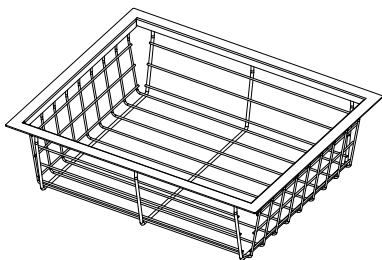

## Attention

1. To avoid the slides move unstable --- During slides installation, should prevent the sawdust or other objects going inside the slides.
2. To avoid the slides move not smooth --- Check if the wardrobe fitting's dimension meets the requirement; Check if the frame is deformed;  
Check if the slides is of the same height, and is of parallel.
3. To avoid the aluminum frame can not close to the end --- Check if the slides' installation dimension meets the requirement;  
Check if the slides is locked.
